

Write given C program logic only goto .

P1.

WAP in C to count odd digits in given any number .

i/p1: n= 342397 o/p: 4

i/p2: n= 468 o/p: 0

P2.

WAP in C to product of last 2 digits of number.

i/p1: n=3457 o/p: 35

i/p2: n=123456 o/p: 30

P3.

WAP in C to sum of last 3 digit of number.

i/p1: 76543 o/p: 12

i/p1: 1278 o/p: 17

P4.

WAP in C to sum of digit divisible by 3 .

i/p1: 345673 o/p: 12

i/p2: 4678 o/p: 6

P5.

WAP in C to sum of alternate digits.

i/p1: 3456 o/p: 8 (3+5)

i/p2: 12345 o/p: 9 (1+3+5)
